

WHY WE FIGHT

A FILM BY EUGENE JARECKI

What are the forces that shape and propel American militarism? This award-winning film provides an inside look at the anatomy of the American war machine.

Why We Fight describes the rise and maintenance of the United States military-industrial complex and its involvement in the wars led by the United States during the last fifty years, and in particular in the 2003 Invasion of Iraq. The film alleges that in every decade since World War II, the American public has been told a lie to bring it into war to fuel the military-economic machine, which in turn maintains American dominance in the world. It includes interviews with John McCain, Chalmers Johnson, Richard Perle, William Kristol, Gore Vidal and Joseph Cirincione.

"It is nowhere written that the American empire goes on forever."
